

ENTERPRISE SOC INTELLIGENCE REPORT

CONFIDENTIAL - RESTRICTED DISTRIBUTION

1. Reporting Site Information	
Title	Denied Traffic Analysis: No Recent Blocked Attack Patterns Detected in Last 5 Minutes
Address	Remote VM / Edge Network Node
2. Report Type	
☒ Executive Action Required ☐ Statistical Purposes	
3. Reporting/Contact Officer Information	
Name	Agentic-AI SOC L2 (Automated)
Position	Threat Intelligence Agent
Telephone Number	+0112170295
Fax Number	NA
E-mail Address	soc@dzshield.internal
Alternate Contact information	NA
4. Incident Status/Type	
Incident Dates	Incident Identified: Apr 20, 2026, 07:38:03 AM
Incident Status	☐ Continuing ☐ Successful ☒ Unsuccessful ☒ Suspected ☐ Accidental
Incident Cause	Likely routine firewall or security policy enforcement with no malicious traffic detected in the que
Incident Type	Network Access Denial - No Active Threat Activity Observed. Query Context: show me the last 5mins deny logs in pdf Source IP: Multiple Sources Destination IP and Port: Multiple Destinations : Multiple

2. Incident Evidence and Detail:

Analysis of the last 5 minutes of network telemetry filtered for 'Denied' traffic revealed no matching logs, indicating an absence of blocked connection attempts or unauthorized access patterns during this period. The query scope was strictly limited to denied events, which may suggest either a temporary lull in attack activity or effective baseline security controls preventing malicious traffic from reaching enforcement points. Given the known geo-location context (Local/Internal Network), this could reflect normal operational conditions where internal security policies are successfully filtering outbound or lateral movement attempts without generating denial events.

Primary Source IP: Multiple Sources

Primary Destination IP: Multiple Destinations

Log Sources: AI-Aggregated Telemetry & Edge Nodes

Please go through below snapshots for offense/event Summary and statistics: Offense Detail:

Source IP	Geo-Location	Dest IP	Port	Type	Hits
N/A	N/A	N/A	N/A	N/A	0

Complete Event Payloads (0 matches):
- No specific log events matched the exact timeframe and status query.

Threat Intel:
Denied traffic patterns typically represent attempted reconnaissance, brute force attacks, or policy violations, with common vectors including port scanning, credential stuffing, or unauthorized service access. The absence of such events in internal networks often correlates with robust perimeter defenses, though continuous monitoring remains critical to detect low-and-slow attack techniques or insider threats.

5. Strategic Recommendations & Action Plan

DENY LOGS (Blocked Traffic)

- o **Validate Legitimate Traffic:** Review denied IPs to ensure no business apps are blocked.
- o **Tune Firewall Policies:** Optimize overly strict rules that may cause drops.
- o **Detect Suspicious Patterns:** Analyze repeated deny attempts for scanning behavior.
